EDUCATION

Ph.D in Civil Engineering (Intelligent Systems) 2020 (expected)
University of Michigan, Ann Arbor, USA
Dissertation: Statistical Methods for the Control of Stormwater Systems
Advisor: Dr.Branko Kerkez

M.Sc.Eng. in Civil Engineering (Intelligent Systems) 2017
University of Michigan, Ann Arbor, USA

B.Tech. (distinction) in Civil Engineering 2015
Amrita Vishwa Vidhyapeetham, Coimbatore, India

ACADEMIC EXPERIENCE

Graduate Student Research Assistant 2016–
Real-time Water Systems Lab, University of Michigan
Development of algorithms, simulation tools, and open source hardware solutions for monitoring and control of stormwater networks.

Research Assistant 2015
Love Biotechnology Group, University of Michigan
Characterization of influent and calibration of process model for Detroit's waste water treatment plant.

Research Assistant 2014
Department of Chemical Engineering, Amrita Vishwa Vidhyapeetham
Aided in the design, construtution, and monitoring of a vertical flow constructed wetland.

AWARDS

Grand prize winner, LIFT Intelligent Water Systems Challenge 2018

Academic Excellence, Amrita Vishwa Vidhyapeetham 2013, 2015

WORKSHOPS

CUAHSI Open Source Urban Hydrology Sensor Bootcamp 2017, 2019

Co-organized and led a three day workshop on the use open-storm's sensing stack for the monitoring and control of stormwater systems.

PROGRAMMING AND SCIENTIFIC COMPUTING

- Proficient programmer in Python, MATLAB, C/C++, OpenMP, CUDA, LaTeX, and bash.
- **Machine Learning Stack:** Experienced in using TensorFlow, PyTorch, GpyOpt for training large scale machine learning models in high performance clusters.
- **Embedded Systems:** Developer of Open-Storm's `perfect-cell`, an open source operating system for environmental monitoring. Experienced in using EAGLE and Cypress modules for designing customized hardware.
- **Cloud Computing:** Experienced in using cloud computing services (AWS, Google cloud, and Azure) for creating backends for streaming data from IoT devices.
- **Stormwater Modeling:** Creator of `pystorms`, an open source python library for the design and evaluation of stormwater control algorithms. Contributor to Open Water Analytics's SWMM and pyswmm, the industry standard for modeling stormwater systems.
- Contributor to `rrcf`, an open source implementation of an unsupervised learning algorithm for anomaly detection in live streaming data.

PROFESSIONAL ACTIVITIES

- Reviewer for the following academic journals:
  - Journal of Hydrology
  - Water Science and Technology
- Member of International Water Association's working group on real time control of urban drainage systems.

MEDIA COVERAGE

- 2018 LIFT Challenge: Grand Prize Winner
- NSF Science Nation: Smart stormwater solutions for aging infrastructure
